

One-Stop Platform for all SMS needs

SMS Wholesale Solution

teleoss.co

TeleOSS

Short message service (SMS) enables digital correspondence like no other. More than being an instrument for communication, SMS is also enjoying immense popularity as a critical business strategy. It is employed as a way to foster client relationships, products, and services promotion and as transactional tool for purchases and inquiries.

While the significance of SMS cannot be defined by a single indicator, one cannot deny that the demand for better sending and receiving pathways is always increasing due to advancements in telecommunications hardware. Businesses must meet such demands to keep up with the times, which can be fulfilled through a comprehensive SMS solutions platform.

TeleOSS commits to being the leading firm for Telecom Software Development. With a professional team of creators and the latest technology applications, TeleOSS presents an all-inclusive SMS wholesale platform that aims to provide VAS delivery requirements of any business environment.

The SMS Wholesale Solution helps significant Tier 1 operators and respective carriers to tap into efficient traffic management systems. It's no secret that SMS is routed to global business processes, which subjects it to astounding international SMS traffic.

TeleOSS is capable and scalable to seamlessly lead the new generation of wholesale platforms that handle copious amounts of data and traffic.

By choosing the TeleOSS wholesale Solution for SMS functions like aggregation and termination, operators and international service providers can expect revenue growth since bilateral agreements and SMS interlinking costs are significantly reduced.

With TeleOSS, effective messaging solutions are within reach.

Product Overview

TeleOSS SMS Wholesale Solution is a robust, scalable, and high-performing platform specially designed for service providers, SMS wholesalers, resellers and retailers anywhere in the world.

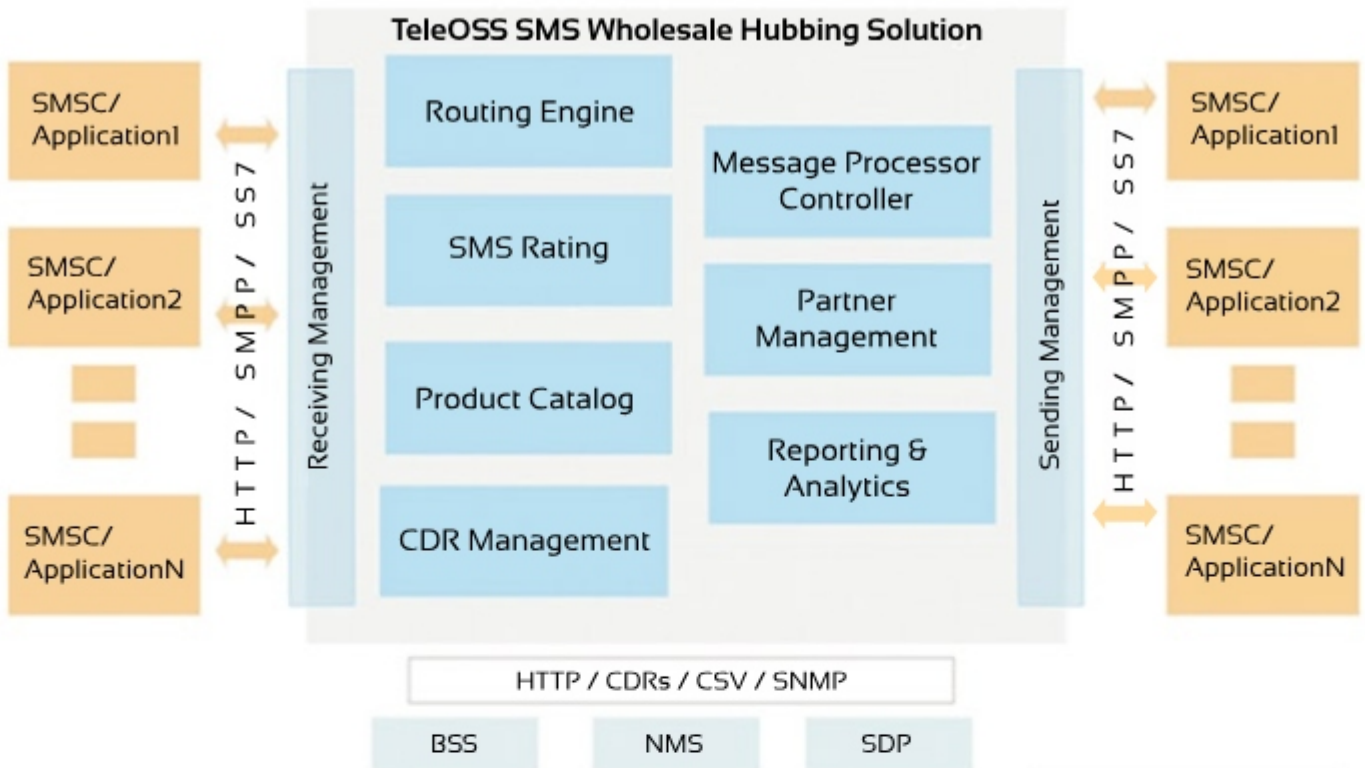

This feature-rich platform caters to global-scale networks like P2P, A2P and Bulk SMS. It is interoperable and integrable with existing telecom systems of a business.

International SMS coverage, monetization options, and full technical support are just some of the perks that come with the TeleOSS platform. Every feature and functionality equipped in this comprehensive offering is an answer to specific requirements in SMS aggregation and termination.

The result is an enhanced business operation and expanded capacity to handle billions of messages, ultimately leading to added revenue, visibility, and success.

SMS Wholesale Model

<p>Wholesale Client Portal</p>	<ul style="list-style-type: none"> • User Activity Dashboard: account, usage, balance and validity • Address book w/ Bulk Importing • Single, Bulk & Group messaging w/ group creation facility • Custom SMS templates, SMS scheduler • MIS, Utility and DLR reports • Create unlimited API key for HTTP API users and grant key-wise IP

SMS Wholesale Features

The TeleOSS Wholesale platform for SMS is packed with features and functionality for SMS coverage on multiple global networks. It opens up any enterprise and user to a myriad of hubs, routing servers, and connections that make SMS delivery a breeze.

Service Management

TeleOSS uses robust messaging protocols like SMPP, HTTP, Parlay X, and many more. It supports an "n" volume of SMS messages through multiple connections, which helps users handle a significant number of data.

It also has advanced features like supplier/vendor wise TPS allocation, Keep Alive, Idle Time-Out, dedicated sending and receiving ports, and more.

Message Management

SMS messages have multilingual support and compliant to the UTF-8 standard format. The available message types that TeleOSS can support include SMPP/HTTP Outbound & Inbound, WAP, binary, push and more.

The platform is ready to store, customize, and forward messages, map error codes, and other functions for active message flow.

Rating and Charging

TeleOSS provides clients with the ability to assign bundle service and destination-based rates and time-specific rate plans. Users can recharge or refund failed SMS through payment methods like PayPal and 2CO.

Multi-currency is supported, and create and manage CDR file for easy invoice integration.

Reporting and Analytics

With TeleOSS, performance and traffic analytics, MIS and delivery status reports are instant and updated. Clients can download reports in their preferred formats, and they can receive timely notifications on balance and account validity, recharge.

System Management

The platform supports Linux and Solaris, and standard protocol HTTP/SOAP API. It is highly customizable, secure, and scalable to integrate with legacy systems.

Why Trust TeleOSS?

TeleOSS SMS Wholesale Solution can be tailored to fit any business environment. By using the feature-packed wholesale model, clients can avail of these benefits:

Cost-saving: TeleOSS' carrier-grade solutions for SMS reduces termination costs and identifies the least route for SMS delivery.
